

Vision Insurance Plans

Vision insurance plans cover examinations for routine eye care and refractions to determine your need for glasses. Medical eye conditions such as glaucoma, diabetes and eye infections are covered under medical insurance plans. Listed below are some of the vision plans that we are affiliated with. If you are unsure of your vision coverage, please call our office and we can help you determine your eligibility.

If you do not have vision coverage, please call our office to discuss private examination fees.
